Annex 5 – Risk management

This is an example of a tool that anyone working with Planète Enfants & Développement can use to evaluate the risks that can come with children being in the presence of staff or volunteers of PE&D:

Necessary questions

- IDENTIFY - What are the practical activities of the program, which present a risk to children?
- RISK – What are the detailed and precise ways things could go wrong?
- PROBABILITY – What is the likelihood of something going wrong? (High, medium, low)
- IMPACT - What would be the consequences to the child?
- ACTION – What means should be used to reduce risks, and what resources are required. Who would be in charge of implementing these actions and when should they be implemented?

Content for risk management:

- Identify possibly actions.
- Determine the necessary resources for reducing risk.
- Put in place precise procedures for rapid and effective management of risks when they occur.

Follow-up on risk situations- ask the following questions:

- Do the risks still exist?
- Have the risks been adequately managed in the framework of the existing procedures?
- Have they been detected, monitored, and reduced in a timely manner?
- Can these risks reoccur?
- Are risks of any other kind likely to arise?
- Can other actions or resources be put to use to better manage the risks facing children?
